## Overview

# Extreme high speed acquisition with uncompromised image quality.

The Genie HC640 offers unprecedented high speed image acquisition with uncompromised signal-to-noise ratio, significantly optimizing the opportunity for increased yield. DALSA's proprietary sensor technology allows for image capture rates of 300 fps in VGA resolution while maintaining exceptional image quality. The Genie HC640's gigabit Ethernet interface takes full advantage of this Genie's high frame rate by transmitting data over standard CAT-5e and CAT-6 cables to distances of up to 100 m. Like all Genies, the HC640 is based on the AIA (Automated Imaging Association) GigE Vision Standard to directly link the camera to a PC.
