

BL-100 Series Backlights provide sharp contrast to outline a parts shape, hide clear housings, and view openings such as drilled holes. The BL-100 Series provides high output (HO) illumination in small, versatile packaging. Using a new approach in thermal management technology for LED illumination, the BL-100 Series is able to support large LED arrays operating at temperature levels that guarantee long life. BL-100 Series modules employ square arrays of LEDs measuring approximately 100 mm per side.
